EMBRACE COLOURS

Tropical style isn't about hard and fast design rules it's equal parts local custom and state of mind. It springs from the part of the world that sits between the Tropics of Cancer and Capricorn, and because it spans so many different countries and cultures, its nuances are many and diverse. The region's strong seafaring tradition brought settlers from far-flung points of the globe who added their own native traditions to create a multilayered, arresting blend.

Modern research has shown that when our eyes connect with a color, our brains release different chemicals that impact us on a physical and emotional level. For instance, being in a red room will increase your heart rate and stimulate chemicals associated with aggression and high energy, while the color yellow stimulates serotonin (the feel-good chemical) in our brains.

Color therapy has been practiced in traditional healing professions for many years, but marketers and businesses more recently have also used color to shift human moods. Once we learn a bit about the attributes of each color, we can use that information to promote the atmosphere we want in the different rooms of our homes. Here are some ideas.
